HOME SALON BOOKING SOFTWARE

# Your salon. Now built for the road.

Salon Scheduler Pro runs a home-visit salon from one place: online booking with an address check, travel-aware calendars, drivers, payments, clients, team and reports.

### Smart dispatch & live traffic

Drive time between visits is worked into every calendar, using real-time Google traffic. Drivers get a clear "My tasks" day with route briefs.

### Bookings that pay up front

Clients book online after an address check, pick a service and stylist, and pay a deposit by card, Apple Pay or Google Pay through Ziina.

### AI chat assistant

An assistant on your booking page answers client questions and helps them book, so your team spends less time on the phone.

### The whole business in one place

Client records and statements, team chat, staff goals, revenue reports, expenses, salaries, campaigns and gift cards.

## Why home-visit salons switch

| | |
|---|---|
| **Late arrivals** | Ordinary salon software books stylists back-to-back with no travel time. Salon Scheduler Pro only offers times your team can actually reach. |
| **Bookings outside your area** | Every client address is checked against the cities and areas you cover before a booking is made. |
| **Drivers on scattered messages** | Drivers see their tasks, addresses and timings on their own screen, and the team talks in built-in chat. |
| **Costly no-shows** | Deposits and payment links mean the visit is paid for before anyone gets in the car. |

PLANS & PRICING

# Simple plans, priced per team

You pay only for team members who log in: owners, stylists and drivers. Client bookings and client accounts are always unlimited. Yearly billing saves about 20%.

### 14-day free trial with every Business feature

Choosing a plan during the trial does not cut it short; the first charge waits until the trial ends. Upgrade or switch plans at any time; the difference is charged or credited for the rest of the month. A cancelled plan keeps working until the end of the paid month. Prices exclude tax, which is calculated at checkout.
